

Best Practice 1

Title of the Practice: Innovation and Incubation Cell

Objective of the Practice: The college has an Innovation and Incubation Cell to impart innovation and entrepreneurship among students.

Objectives of the practice are:

1. To enhance the entrepreneurial spirit.
2. To provide entrepreneurial knowledge.
3. To provide a platform for inculcating entrepreneurial skills in students.
4. To encourage students to get self-employed.
5. To organise Entrepreneurship Development Programs and Workshops.
6. To motivate the students for participation in start-ups.

The Context: Many students are from agriculture background having agricultural resources for self-employment; but the fear of risk stops the students to indulge in entrepreneurship. It is often observed that students have skills and entrepreneurial abilities, but require nurturing and incubation. Creating new products, services and stimulate employment is the aim of I & I Cell.

The Practice: The platforms created by the college inspired the students to bring out innovation in the field of Commerce and Management. The students of BMS and BAF have created a business model which was appreciated by all.

Evidence of Success: The students acquired skills of learning by doing. The model of "Optimizing the Sale in Business" developed by the students has proved extremely useful for the Business Organizations. Steps towards developing skills in communication, decision making, networking, time management, team building, presentation, negotiation and social skills were certainly acquired by the students. Some of students started their own enterprises in Spices, Cotton, and Automobiles etc. An insight to develop opportunities of self-employment with the available resources and skills is developed.

Problems Encountered and Resources required to implement the Practice: The College is located in far-flung area which is connected by narrow roads so travelling to the bigger market places is always a matter of great discomfort. The incubators like Banks and other expert guiding centres are reluctant to provide financial support as the students belong to the poor families. Initial funding, financial resources, risk bearing and marketing are yet other issues faced by the students. Moreover, to build trust among students takes time as many of them hail from rural and tribal areas. Getting and staying organized, determination and learning, balancing the schedule including marketing and sales activities are a constraint among the students.

Best Practice 2

Title of the Practice: Adoption of Village

Objectives of the Practice: As a part of social life, community services start at school and college level. The college has adopted the native village. The students are given an opportunity to connect with the village folks and develop a sense of commitment for team work.

Few objectives are –

1. To broaden the perceptions of the world around the students. To help the students to establish the communication with the surrounding.
2. To inculcate values and develop a sense of social responsibility among students.
3. To understand social problems of the society. To develop Personality of student.
4. To build confidence among students.

The Context: The outreach activities give life lessons which complement the academic knowledge of the students. The commitment to stick to the mission of the institution is the driving force for the selection of the practice. During rendering services to the village, the students inculcated discipline, sincerity, devotion which taught them to be responsible, secular and committed human beings; which is the need of hour. Our institute is a premier institute of excellence in knowledge building and social development.

The Practice: Students and staff are actively engaged in carrying out community activities in the adopted village. The institutional base is expanded by the activities undertaken for the development of the village. The various outreach activities were conducted by NSS and alumni in the village like tree plantation, cleaning, development of study Centre, organizing counselling activities in the village for the needy and particularly for the students. Knowledge sharing and interaction with lactating mothers was done in the village during International Breast Feeding week every year. Celebration of International Water Day, Earth Day, International Day for the Disabled, etc, have contributed to create awareness among the villagers towards missions and goals of United Nations which concern larger societal needs.

Evidence of Success- Students participated in *Swachha Bharat Abhiyaan* at the village. Students distributed food and clothes to the needy. Tree plantation is a regular outreach activity and seed ball were prepared and thrown on the barren land by the students of our college. Special NSS camps were held at the nearby villages Vasari for seven days every year to inculcate social sensibility among the students. Communication skill development, social responsibility, willingness to serve the society, helping nature, ability to understand the

problems of common man, ability to face the natural calamities, leadership skill, connecting to people and enabling volunteerism are the outcome of the practice. The Cleanliness drives and *Swaccha Bharat Abhiyan* programs are duly acknowledged by the villagers.

Problems Encountered and Resources Required to Implement the Practice: Sometimes, student participation is difficult due to the academic schedules. Parents are not willing to send their wards to participate in social emersion. Passive participation of villagers and local representatives, lack of awareness and misconception about the Governments welfare schemes are major hurdles in organizing students outreach activities. To arrange outreach activities, sufficient financial aids are required. These activities are mainly carried out by the Institution's funds and contribution from the teachers. Financial contribution from the students is difficult because most of the students are belonging to economically weaker section. It is rarely seen that families are living jointly. Children are busy spending their time in their own virtual world or hanging out with friends. Sharing, living together, sacrificing simple things, has become difficult.

Adoption of villages is instrumental in developing sense of belongingness among the students and the villagers. It also helps to develop the spirit of working together, task management, actually knowing each other, sharing and connecting.
